

My husband and I are retired and we travel in excess of 20,000 miles each year. We pull a tent trailer and camp out since the cost of staying in hotels and motels would be prohibitive on our retirement income. We depend on the weather and road condition information we get on our XM radio for safety. We need to know what we are driving into. As we travel across the county, we have no way of knowing what local radio stations would give us this reliable information. We urge you to REJECT the National Association of Broadcasters Petition 04-160 which would take away our right to choose what we listen to. We pay for this service because we need the information XM radio provides to us. I fail to see how this is any business of the National Association of Broadcasters or any other radio station for that matter! What right do they have to tell us what station we listen to?
